

PROTOCOL FOR DISINSECTISATION
PRODUCT : HYGIASEPTYL® AQUEOUS BASE (HI 130),
(Voir fiche technique et fiche de données de sécurité)

L'Hygiène Active !

Disinsectisation has to take place imperatively before careful cleaning of volumes to be treated.
Switch the diffuseur on before leaving the room (diffusion without human presence).

Then proceed to careful conventional cleaning.

Wear a mask and eye protection when spraying with the flexible (Easysept, Technisept).

See safety data sheet.

Places (Exemples)	Volume (exemples)	Diffusion time	Comments : diffusion time is only indicative and depends on the configuration of places (ex : presence or not of a air-conditioning system)
ROOM	40 m ³	12 minutes	Before conventional cleaning without human presence. Remove the sheets and put the mattress on its side. Open cupboards. Wait 2 hours before reusing the premises.
ROOM	60 m ³	18 minutes	Before conventional cleaning without human presence. Remove the sheets and put the mattress on its side. Open cupboards. Wait 2 hours before reusing the premises.
ROOM	80 m ³	24 minutes	Before conventional cleaning without human presence. Remove the sheets and put the mattress on its side. Open cupboards. Wait 2 hours before reusing the premises.
TOILETS	60 m ³	18 minutes	Before conventional cleaning without human presence. Wait 2 hours before reusing the premises.
CORRIDOR	100 m ³	30 minutes	Before conventional cleaning and without human presence in corridors and in adjoining rooms. Wait 2 hours before reusing the premises.
MEETING ROOM	100 m ³	30 minutes	Before conventional cleaning without human presence. Wait 2 hours before reusing the premises.
MEETING ROOM	200 m ³	60 minutes	Before conventional cleaning without human presence. Wait 2 hours before reusing the premises.
BREAKFAST ROOM	300 m ³	90 minutes	Before conventional cleaning without human presence. Wait 2 hours before reusing the premises.
RESTAURANT	400 m ³	120 minutes	Before conventional cleaning without human presence. Wait 2 hours before reusing the premises.

Can also be used for disinsectisation at the bar , in cabinets, linen rooms, cupboards, offices, technical and waste premises, diffusion time depending on the volume of the premises to be treated (see exemples on the table above).

Can also be used for disinsectisation in kitchens : without presence of any foodstuffs and wait 2 hours before proceeding to conventional cleaning.
